Pony Bird

Disability Awareness Program

Give your class or club the opportunity to grow into more compassionate, inclusive individuals. Our interactive program invites kids to explore the world of disabilities in a meaningful, hands-on way.

Through engaging activities, they'll learn about "person-first" language, interact with adaptive equipment, and hear real stories from individuals with disabilities.

At Pony Bird, we believe kids need the right tools:

- A safe space to ask questions,**
- The language to talk about differences respectfully,**
- And the perspective to celebrate diversity in themselves and others.**

Let us help you empower the next generation to be more inclusive, kind, and aware. Call us today to learn more!
